Please read carefully before completing this form

please consider and read this part before filling the form.

- Please check if the title you wish to suggest is not already in Scopus in the [Scopus title list](#). Please be aware that active Medline-sourced titles (see column M in the title list) may also be suggested for full Scopus coverage.
- New titles are reviewed by the independent Scopus [Content Selection & Advisory Board](#) (CSAB) on a continuous basis.
- We strive to evaluate new title suggestions as quickly as possible, however, please allow for several months up to one year for the review process to be completed.
- The CSAB uses sample documents of published content to evaluate the quality of the title. We recommend that a title has published for at least two years before it is suggested for inclusion in Scopus and we may reject a title suggestion for review if the publication history is too short to review the title.
- If you are suggesting a title as a **Publisher or Editor**, you will be asked to provide sample PDFs as a final step in the title suggestion process. **It is not possible to complete the title suggestion process without uploading PDFs.**
- Be aware that the evaluation of a title is not influenced by the number of times it is suggested. Multiple submissions of the same title will only delay the review process.
- Review of your title suggestion does not guarantee selection of the title.

If you have any questions about the evaluation process, you can contact us at titlesuggestion@scopus.com.
